Welcome to Thorntons Investments

Discretionary Investment Management

At Thorntons Investments, we pride ourselves on offering truly bespoke discretionary portfolios, tailored to meet the unique needs and circumstances of our clients.

Unlike many of our larger peers, your named contact is the same dedicated individual making the investment decisions and monitoring your portfolio, offering both transparency and accountability.

Investment decisions are not being taken from a central location and pushed out to regional hubs, but are made by the team, based in Dundee and Edinburgh.

How We Invest

Asset Allocation

Long-term Strategic Asset Allocation forms the bedrock of any good investment strategy. If we have done our job correctly, this should not change significantly over a five-to-ten-year period. However, this does not mean that we do not make short-term tactical changes.

Stock Selection

Using a combination of in-house research, and third-party resources, we are not limited in the investment options available to us. From direct equities to alternative investments, fixed income to infrastructure, there are no areas we cannot research or consider.

When done effectively, stock selection can significantly enhance portfolio performance, manage risks, and align investments with the investor's specific goals and preferences. Whether for growth, income, capital preservation, or exploiting market opportunities, thoughtful stock selection is essential for successful portfolio management.

Diversification

Good management does not always mean picking the winners. Sometimes it is as much about avoiding losers.

Think of diversification as placing an each-way bet rather than always betting on-the-nose. Diversification can:

- Reduce Risk
- Enhance Returns
- Smooth Volatility
- Provide Investor Comfort
